

NOTICE: The Kittitas Reclamation District (“District”) hereby gives notice that it will accept sealed Bids for the construction of Project No. 33-SBC-1005, the South Branch Canal Improvements – Milepost 10.4 to Milepost 10.85 project (“Project”).

The District will receive sealed Bids at the location listed below until 2:00 p.m. local time on December 3, 2021, and will then and there open and publicly read the Bids for the construction of the improvements.

Kittitas Reclamation District  
315 North Water Street  
Ellensburg, Washington 98926

Bid improvements consist of open channel canal replacement with large diameter pipeline, and road improvements, drainage, earthwork and other work, all in accordance with the contract plans, the contract provisions, and the specifications. The improvements are for construction of water conservation and operational improvements to the KRD system. Requested work follows the existing South Branch Canal alignment. The segment begins downstream of the existing Canal Control Structure 10.4 and extends up to approximately 2,100 feet downstream of turnout near milepost 10.8.

The Project has been divided into a Base Reach and an Optional Reach. The base bid improvements in these documents are for roadway improvements and pipeline replacement of open channel from the existing 84-inch steel reinforced HDPE pipe transition as work related to canal improvements for 800 feet between Stations 551+25 (MP10.44) and Station 559+25 (MP10.59).

It is the District’s desire to improve the remaining reaches of the canal between Robinson Creek and Manastash Creek. Pricing of the an initial reach extension is requested for potential optional award at the discretion of KRD. The optional bid improvements in these documents are for roadway improvements and pipeline replacement of open channel described

as work related to canal improvements between Stations 559+25 to 572+25. Optional award will depend on a variety of factors, including, but not limited to, grant funding award, weather, cost, Contractors work plan, demonstrated productivity on base bid reach, and the anticipated start of the 2022 irrigation seasons on or about April. This optional pricing will not be factored into evaluation of apparent low bidder.

Plans, specifications, and Bidding Documents are only available electronically on the District website beginning November 5, 2021 ([www.kittitasreclamationdistrict.org/current-bids](http://www.kittitasreclamationdistrict.org/current-bids)).

Bidding Documents are for the purpose of obtaining bids for the Work. No authorization or conference of license is granted by District issuance of the Bidding Documents. Bidders are solely responsible for the cost of preparing their Bids. The District specifically reserves the right, in its sole discretion, to reject any or all Bids or re-Bids or to waive inconsequential deviations from Bid requirements not involving time, price, or work quality.

A pre-bid conference will be held at 9 A.M. local time on November 15, 2021, beginning at the District office. Representatives of District and Engineer will be present to discuss the Project. Bidders are encouraged to attend and participate in the conference.

For bidders unable to attend the scheduled pre-bid conference, please contact the District office to schedule access to the site to view existing conditions. Questions will not be entertained during such an independently scheduled site visit. Any question stemming from the site visit will need to be submitted for public response through the District bid information posting process.
